

AMENDMENT TO THE CLAIMS

Please cancel claims 1-23 and add claims 24-31 as follows.

- 1 1 - 23 (Canceled)
- 1 24. (New) A software product carrying code for providing data communications in a
2 computer system, wherein execution of the code by one or more processors causes the one or
3 more processors to perform the steps of:
4 accepting message information within a unified exchange manager;
5 executing the unified exchange manager to select an appropriate application from a
6 plurality of applications that are executable on the computer system, the unified exchange
7 manager selecting the appropriate application based on a data type of the message
8 information, wherein said unified exchange manager communicates with a plurality of
9 communication libraries, each said communication library implementing a particular protocol
10 for external communication, wherein at least one of said communication libraries comprises
11 a wireless communication library;
- 12 determining whether a user accepts said message information; and
- 13 passing said message information from said unified exchange manager to the
14 appropriate application program in response to said user accepting said message information.
- 1 25. (New) The software product of claim 24, said steps further comprising:
- 2 alerting said appropriate application that said appropriate application will be receiving
3 said message information.
- 1 26. (New) The software product of claim 24, wherein said message information is from
2 an external source.
- 1 27. (New) The software product of claim 24, wherein said message information is from a
2 second application program.

- 1 28. (New) The software product of claim 24, said steps further comprising:
 - 2 returning from said appropriate application program a call handle that activates said
 - 3 application program and displays said message information.
- 1 29. (New) The software product as claimed in claim 24, wherein the at least one wireless
- 2 communication library comprises an infrared communication library.
- 1 30. (New) The software product as claimed in claim 29, wherein said infrared
- 2 communication library implements an IrDA protocol.
- 1 31. (New) The software product as claimed in claim 24, wherein one of said
- 2 communication libraries comprises a pager communication library.

Respectfully submitted,

HICKMAN PALERMO TRUONG & BECKER
